DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claim 1 recites a process for the alcoholysis of acid oils of vegetable or animal origin. However, it is unclear to the Examiner how the process is carried out because applicants claim language is quite incoherent and there appears to be no definitive process steps for the alcoholysis of acid oils of vegetable or animal origin as optional language is recited (e.g., can transesterify...). Also it is unclear what is meant by acid oils of vegetable or animal origin. Since vegetable or animal oils are known to be fatty esters, does the term "acid oils" mean that additional acid components are included in the oils or does applicants mean to refer to the free fatty acids of the vegetable or animal oils?
